Mr. Justice Leach lost a pair of binoculars on Sunday evening. He reported the matter instantly to the Police saying that he thought they might have been forgotten in a chair he had taken from the tramway terminus at the Peak. A Chinese constable went into the chair coolies' boarding house there and promised the coolie who should produce the binoculars a reward. They were produced and the unfortunate coolie was at once arrested. At the Magistracy yesterday the binoculars were returned to Mr. Justice Leach, the chair coolie was discharged, and the Chinese Constable severely rebuked for promising the coolie a

PROM OUR CORRESPONDENT.

When I call this news let me hasten to add that it is reported news. Well-informed officials here who are cognisant of the more occult ourrents in the political tides of the capital actually say that the preliminary guarantees have been given. Personally I am disposed to discredit this, but I deem it exceedingly probable that such a project has now boon adumbrated and that it will be boldly pushed in the immediate future. The political, strategical, and commercial sequences and bearings of such a milway are so obvious that I need not delate on

Russian diplomacy has not been innetive in Dr. H. Kemple Northern China since Count Cassini's departure; and indeed there are those who say that his Excellency's furlough has only given a freer Mr. C. Allison hand to Mr. Papilon, the able first Secretary, who was the real originator and mainstay of the Cassini projects. This policy at present consists of multiplying and onhancing Russia's interests in China; of getting into closer educational, military, and trade contact with the Northern | Colonel L. H. Gorge provinces, and of slowly instilling into the Chinese mind that Russia's present friend. Mr. H. Hursthause ship is indispensable and her future domination Mr. Chunter Inchbaid inevitable.

The alertness and autivity of Russian Agen-

cies up here is incredible: they are omniprosent and indefatigable. Colonel Wogack, the military attaché, now keeps two secretaries fully employed and in his personal movements is as a biquitous as the lack reporter of an American paper. The local Mining College for Chinese students is being pushed, notwithstanding the masterly inaction of the officials; the language, methods, and experts are to be exclusively Russian But after all perhaps the most subtle and incisive attempt to sproud Russophilism and to doprecate Russophobia is seen in the endeavour to control the new vormentar paper. This journal will not be subsidized in the crude sense of the word, but none the less it will be a platform from which the Great White Czar will be exhibited in his most benign aspect to the Chinese reader. There will be no backsheesh, but the paper will circulate largely in Russian territory where Chinese settlers are found, and will be found advocating the unity of interest and destiny of the two peoples.

It may be asked if our folkere showing them. selves alive to all this. Well, there is no doubt that Sir Claude MacDonald is kept fairly well informed, and that Downing Street understands that Russia is heeding the infinitely small as well as manipulating the big key-board of diplomacy. The Foreign Office recently communicated to Peking its warm approval of the policy which has resulted in 1,400 mow of land being handed over to the control of the British Municipal authorities in Tientsin. I may here interpolate the flattering remark of a logation official, " that in a long experience with the Chinese he had never known anything put through with so much tact and good will, and with so little friction on all sides. We distinctly feel this to be a feather in the cap of the three or four Tientsin gentlemen who so unobtrusively initiated and upheld the policy for which Consul Bristow got all the credit: assuredly he deserved credit, though not a monopoly thereof.

Sir Claude himself manifests the most eager interest in all that concerns his countrymen. . He also is seeking to enlarge and strengthen our stake in China. He is at present on a visit to Mr. Claude Kinder at Tonoshan, inspecting the result of some fifteen years of hard work by that able engineer. It is suspected that Mr Kirder is once more the object of a big in. trigue, and that the Minister's deliberate manifestation of interest in his work has a aignificance greater than meets the casual notice. We have his Excellency's own word for saying that on this occasion he is not

going South This is the eve of the race meeting and our sporting community is tremulous with the excitement of letteries and auticipation. Lust night the Champtonship lottery reached the aggregate of \$2,100, \$700 being offered for Mr. T.H.P's stable. These modest numbers are record figures for Dientsin, where the gambling element of racing has always been subordinate.

may interest Hongkong racing men to know that an enterprising Tientsin owner hopes to go down this winter and try his fortunes in your Olympians. The last time this was done was, I think, in 1892. In the Seventies and early Eighties it was by no means as rare a proceeding as it has since bacome. I will not assume the mantle of a prophat horse flesh has a curious tendency to idustrate the slipperiness of the short route twixt cap and lip; but if our Tientsin owner does put in an appearance, your men may have t look to it. One of his ponies holds the China record for 14 miles and the other is supposed to be a phenomenal griffin hald back in honour of new, and would be very suitable for a Public the occasion.

THE SUGAR INDUSTRY IN JAVA.

weighs down the sugar planters in Java by reducing freight rates affecting them on railways there, and by making the boon retrospective, they produce a temperature of 260 deg., which This is taken as a sign that the new Colonial Minister seeks the good of the planting interest, but the planters expect more from him. They sak for the abolition of the expert duty on sugar in Java. A section of the planters urged greater concession in the abape of expert premium to equal the sugar bounty in Holland. Some of them deem that the preferable course would be to agitate for the gradual abolition of the Dutch tounty system. A blow new overhangs the plan-ters from another direction. Reports reach them that chemists in Europe have found out the way
to make sugar out of points flour. There is no
thing chemically impossible in this. The Source
baya Courant considers that, should it indeed prove remunerative to manufacture sugar out of this form of starch, worse days than the present bad times are instore for sugar planters.—Straits Times.

These Capsules are used in the London and Paris Hospitals in place of Copahia Cubebs, and astringent injections; they relieve the patient, without causing any of the wel

known inconveniences of these old remedies, in 48 hours. Dr. POSNER says: The purity of Oil Santal is of the greatest importance: the best form we have used is the French preparation known as Santal-Midy sold in small capsules easy to swallow and readily supported by the stomach -- Deutsche Medicinal Zeitung, July

SANTAL-MIDY is sold in bottles of 40 spherical capsules, each of which contains 5 drops of the pure amber-coloured Sandal-wood oil distilled by Midy's process. All Capsules bear the name "Midy" printed in black letters.
